## PRODUCT OVERVIEW

These fiber pigtailed devices are meant to be used for a single wavelength within their range of operation [980-1100 nm]. They can be used for intensity modulation, fixed or variable frequency shifting, pulse picking or q-switching. AA offers a complete range with different carrier frequencies, different rise times, input optical power. Moreover, in order to meet most requirements, user can select the fiber type, fiber jacket and fiber connectors among the proposed ones.

## FEATURES

- High Speed.
- High Extinction ratio.
- Robust & versatile.
